## SOLAR<sup>e</sup>PROTECT

### Solar Inverter Safety Cabinet

Protection cabinet for inverter and other components, belonging to sun-energy systems.

This cabinet will give your house protection against eventual fires from the used components, and protects these from outside influences, like direct sunshine.

#### Product description:

- Double-housing, with air-duct, so heat transmittance will be slowed down.
- Box's construction gives room for sufficient air circulation.
- Significantly improves the safety of people and domestic animals because it is difficult to access live wires and other components.
- It gives the internal components protection against weather unfavorable conditions, like heat radiation from the sun.
- Easy Vero-board, e.g. for fastening instruction- and name-plates.
- The security cabinet is developed for ergonomic construction.
- Easy installation: When the cabinet is mounted on the wall, the components can simply be fixed on the retractable Vero-board, and after that the wires can easily be connected.
- In good taste and high quality, Product of Finland
